

# DIGITAL DEFENSE CYBERSECURITY SUMMIT

## 8:00 - 8:30 am | Registration & Networking

Check-in and enjoy networking coffee before we kick off.

### SESSION 01

#### Effective Incident Response Planning with Hands-on Tabletop Exercises

8:30 - 9:30 am | All Covered

Join us for a hands-on session focused on top tips for developing and testing your organization's incident response plan in an AI-vulnerable threat landscape. This session includes expert-led practice with tabletop exercises that you'll implement in an IRP playbook. It's the perfect, practical session for IT and cybersecurity professionals, risk management teams, compliance officers, and decision-makers to ensure your organization is prepared to handle cybersecurity threats effectively.

### SESSION 02

#### 10x Your Visibility: Proactive Exposure Management Across the Modern Attack Surface

9:30 - 10:15 am | Tenable

As cyber threats become more complex, traditional vulnerability management isn't enough. Exposure management offers a proactive, modern approach to identifying and reducing risk across IT, OT, cloud, identities, and applications. This session will explore how to gain unified visibility, understand critical attack paths, and reduce manual effort—helping you strengthen your security posture and minimize business impact.

10:15 - 10:30 am | Break

**Continued**

# DIGITAL DEFENSE CYBERSECURITY SUMMIT

SESSION

**03**

**Create your own edge in cybersecurity with an MSP partner**

**10:30 am - 11:15 am | ITW**

We know cyber threats are evolving rapidly (and that we must keep up), but what does that mean for your cybersecurity strategy? Partnering with the right MSP gives you the answers while reducing costs, speeding up response times, and gaining peace of mind. Learn What MSPs can do to address critical issues within your IT environment as we discuss what's changing in Canada's cybersecurity space.

SESSION

**04**

**Layers of Defense: Building Cyber Resilience from the Ground Up – All Covered, Tenable, and ITW**

**11:15 am - 12:00 pm**

Building true cyber resilience goes beyond deploying tools—it requires a layered strategy that integrates IT management, security operations, and compliance expertise. In this session, we'll explore how Managed Service Providers (MSPs) serve as the connective tissue between strategy and technology, helping organizations design and maintain adaptive, multi-layered defenses. Join our panel of experts to learn how to strengthen your cybersecurity posture with a proactive, integrated approach—and get answers to your toughest questions.

**12:00 - 1:00 pm | Lunch & Networking**

Enjoy a catered lunch and casual conversation with peers and speakers.

**Ready to turn insight into action? Your next cybersecurity upgrade starts here.**
