

A woman with long dark hair, wearing a grey sweater, is looking down at a tablet computer she is holding. She is in a server room, with server racks and blue cables visible in the background. The lighting is dim, with blue highlights from the server racks.

RETHINK YOUR BUSINESS POTENTIAL WITH IT WEAPONS CLOUD SOLUTIONS

In a rapidly evolving digital landscape, cloud solutions empower businesses to streamline operations and focus on innovation.

Meeting these demands requires specialized expertise. IT Weapons has the people, processes, and tools to address your cloud requirements, from turnkey Infrastructure-as-a-Service options to cloud architecture and secure, high-performance connectivity for your hybrid cloud environment.

Our wide range of cloud solutions can give you access to innovative technologies, class-leading security while allowing your hybrid workforce to achieve your organization's objectives.

Empower your business with the flexibility to connect and collaborate securely from anywhere and through any device.

GIVE YOUR BUSINESS THE CLOUD CONFIDENCE IT DESERVES

For your organization's growth, having a robust cloud strategy is imperative. It allows your organization to rapidly scale based on market needs without having to invest in expensive hardware. Not sure what is best for your business? We've got you covered!

We offer a wide range of fully managed, supported, and reliable cloud solutions and services. If you need a highly customized solution with strict compliance measures in place, leverage our private cloud suite. And, if you're moving away from your existing on-premise systems and want secure access to data and apps through the public cloud, explore our Microsoft Azure solutions.

PRIVATE CLOUD

Navigating today's market challenges can be daunting, especially for organizations dependent on legacy infrastructure. With IT Weapons private cloud, you get enterprise-grade resources that are budget-friendly and dedicated to your organization.

- IT Weapons manages security, availability, and maintenance of the cloud infrastructure.
- 100% Canadian Data Centres and SOC 2 Type II accreditation.
- Data backups, archiving, and offsite data replication.
- Data Centre design and management, including racking, cabling, power, and cooling with capacity planning.
- Active Directory and Exchange, Application and File Servers & SQL.
- Customizations designed and implemented by a dedicated team of experts.
- Ability to run industry-specific apps with extremely low latency.
- Secure, high-performance cloud connectivity: WAN, managed firewalls, antivirus, and anti-spam.

PUBLIC CLOUD (Microsoft Azure)

Microsoft Azure is revolutionizing cloud solutions with advancements in AI, machine learning, analytics, and many other areas. However, navigating its architecture design and security can be challenging for your team. That's where we come in. Our Microsoft Azure experts manage the complexity, control the costs, and keep your business safe amidst the ever-changing security landscape.

- Better Return on Investment as you pay only for resources you use.
- Highly adaptable as Microsoft Azure is flexible, scalable, and globally accessible.
- As we are a Microsoft Solutions Partner, you get access to faster Microsoft escalation along with value-added bundled solutions.
- A dedicated cloud team and service desk for 24/7 monitoring, alerting and support.
- Benefit from Microsoft Azure add-ons like Azure Files and SQL to further enable your business' IT strategy.
- On-demand cloud servers and elastic storage options.

MICROSOFT 365

If your organization is looking for a complete solution to enhance collaboration and creativity between your distributed workforce, Microsoft 365 is the answer. We have specifically designed modular approaches to each of the apps within the Microsoft 365 suite so that your distributed workforce can connect better, and your business can grow.

- Seamless collaboration and exchange of files and data through SharePoint and OneDrive.
- Advanced Email capabilities, including extended storage and better security through Exchange Online.
- Enhanced reporting and data analytics through PowerBI.
- Improve collaboration within your entire organization through Microsoft Teams.
- Full-service application license management.

MICROSOFT ENTRA ID

With apps, data, and services constantly moving from on-premises to hybrid and cloud environments, your business needs a partner you can trust to help manage the complexity and security. As part of your cloud transformation, we can help simplify identity and access management for your users.

- Central admin portal to augment user management.
- Improved access control to specify who has access to applications and files.
- Enhanced security with Single Sign on and Multi-Factor Authentication
- Extended compliance and readiness through in-depth reporting and insights into user activities.

WHY WAIT TO UNLOCK THE FULL POTENTIAL OF YOUR BUSINESS?

Let IT Weapons deliver simple, cost-effective cloud solutions to enhance your business operations. With the help of a dedicated cloud consultant to walk you through the options available to you, you can unlock secure, flexible connectivity anywhere, anytime, on any device.
