

OFFICE 365 SECURITY & PROTECTION

SAFEGUARD YOUR EMAIL, SECURE YOUR SENSITIVE DATA, AND PROTECT YOUR USERS FROM TODAY'S ADVANCED ONLINE THREATS.

Microsoft provides excellent security for their cloud infrastructure, but you still have plenty of work to do. Each Microsoft Office 365 and Exchange Online customer is responsible for their own data in the cloud. This is why Office 365 security should be a very real concern for you and your organization.

IS OFFICE 365 CRITICAL TO YOUR BUSINESS?

Microsoft Office 365 is the new norm for productivity, collaboration, and communication, yet many organizations forget to ask themselves one key question...Is my business at risk? If Office 365 is an essential part of your business, consider the following questions:

 **How long would it take you to restore an employee's online mailbox in case of accidental deletion?**

 **What would happen if you lost all of your data stored in SharePoint Online or OneDrive?**

 **What is your plan for dealing with encrypted data from a nasty ransomware attack?**

 **Do you have a plan in place to reduce phishing attacks, spam, and malware?**

STAY PRODUCTIVE, STAY SECURE

Our Office 365 Security & Protection solution is designed to get the most out of your Office 365 subscription. With additional layers of protection and properly configuring, utilizing, and monitoring Microsoft's built in security features, our Microsoft and Security experts will provide your businesses with the following key benefits:

SECURE WEAK ENTRY POINTS

- Prevent weak passwords from causing harm to your Office 365 tenant
- Protect user accounts to prevent data loss and stolen passwords

STOP MALICIOUS THREATS

- Reduce spam, phishing and malware attacks that can threaten your business
- Stop malicious files from spreading across SharePoint Online and OneDrive

BE READY FOR INCIDENT RESPONSE

- Enable additional audit records for faster forensic analysis and issue resolution
- Constantly review and improve security with Microsoft's built in Security Score
