

SAAS PROTECTION

PROTECTION, RESTORATION, SECURITY, AND COMPLIANCE FOR OFFICE 365 AND G SUITE

Cloud storage and SaaS applications such as Office 365, Exchange Online, and the G Suite are designed to boost productivity, however, in order to stay productive, your employees and your data rely on one critical factor: **peace of mind**.

HUMAN ERROR MAKES UP 70% OF ALL SAAS DATA LOSS

This includes accidental deletion and file overwriting. In this increasingly susceptible cyberspace, **what are you doing to bolster your SaaS protection?**

Without tools in place to protect your employees from data loss, your business faces undue risk when it comes to productivity and resiliency. If severe data loss is a concern for your business, **then backing up your Office 365 and G Suite is the right place to start.**

GET TRUE SAAS PROTECTION AND CLOUD TO CLOUD BACKUP

Add safety and expert support to your Cloud portfolio with SaaS Protection, a comprehensive cloud to cloud backup solution that can backup and protect data in:

OFFICE 365

Exchange Online
OneDrive
SharePoint Online
Microsoft Teams

G SUITE

Gmail
Google Drive

Backed by 24/7 monitoring and support, SaaS Protection ensures that your data will remain available when and where you need it. Paired with IT Weapons award winning Managed Services practice, SaaS Protection can provide your business with the following key benefits:

- 🔒 Quick recovery from ransomware
- 🔒 Protection from user error
- 🔒 Security against insider threats

- 🔒 Satisfy compliance requirements
- 🔒 Ability to “un-do” malicious attacks
- 🔒 Added peace of mind

NEED TO RESTORE FROM A SPECIFIC DATE AND TIME?

Microsoft states that “point-in-time” restorations of mailbox items are out of scope

SAAS PROTECTION

BACKUPS, RECOVERY, AND PEACE OF MIND

A common misconception regarding Office 365 and G Suite applications is that they are backing up all of your data. While Microsoft and Google replicate data in their Cloud, this does not protect your business from accidental deletions, corrupt data, or cybersecurity threats such as ransomware. Furthermore, getting your data back without a Managed Backup solution can be tricky and time consuming.

ACCIDENTAL DELETION ACCOUNTS FOR **64%** OF DATA LOSS

While Microsoft and Google certainly have you covered when it comes to any outages on their part, recovering data due to accidental or malicious deletion is your responsibility.

COMPLIANCE MADE SIMPLE

Your data deserves better than industry standard security. Go above and beyond industry standards to make sure your cloud data is secure, easily recoverable, and protected.

- 🔒 SOC 2 Type II audited
- 🔒 Supports PIPEDA compliance needs
- 🔒 Data encryption both at rest and in transit
- 🔒 Data controls and monitoring tools including audit logs, uptime and availability SLAs, and export capabilities
- 🔒 Options for either one year or infinite data retention, depending on your individual requirements
