CLOUD SOLUTIONS

CLOUD STRATEGY ISN'T ABOUT TECHNOLOGY, IT'S ABOUT BUSINESS OUTCOMES

Today's distributed IT footprint demands true expertise to handle capacity management and planning, secure connectivity, and multi-cloud orchestration.

From turnkey Infrastructure-as-a-Service options to cloud architecture and secure, high-performance connectivity for your hybrid-cloud environment, IT Weapons has the tools and talent to keep your business productive and safe.

Whether you are looking to modernize your application infrastructure, migrate your email to the cloud, or increase availability and resilience for critical workloads and data, our wide range of cloud solutions and services can help you achieve your business goals.

Give your business the flexibility and power to connect and collaborate confidently and securely anywhere on any device. We can help you get there.

CLOUD SOLUTIONS FOR YOUR BUSINESS AND YOUR BUDGET

Today's high-performance IT infrastructure is complex to design and operate. Mission critical IT demands experts who understand cloud architecture and know how to upgrade, patch, secure, monitor, and scale your IT environment. Get peace of mind with a lead Canadian cloud provider you can trust. We offer a wide range of fully managed, supported, and reliable cloud solutions and services:

- Windows Server solutions - Active Directory and Exchange, Application and File Servers, SQL and more

- On-demand cloud servers and elastic storage options

- Turnkey Disaster Recovery Solutions: replication, geo-redundancy across Canada and more

- Secure, high-performance cloud connectivity: WAN, managed firewalls, antivirus and anti-spam

- Server virtualization and infrastructure services: VMware, Microsoft and Citrix

- Storage virtualization - SAN, iSCSI, and fibre

- Private cloud data backups, archiving, and offsite data replication

- Data Centre design and management - racking, cabling, power and cooling, and capacity planning

- End-to-end data centre migrations and upgrades

- A wide range of support options: up to 24/7 system monitoring and performance management

- Full-service application license management

WHY THE IT WEAPONS CLOUD?

Security, availability, and quality of service are guaranteed. Stop worrying about hardware and software maintenance and endless upkeep. IT Weapons Cloud services can help you free your time and simplify your approach to IT. With the IT Weapons Cloud, you get turnkey infrastructure as a service and real peace of mind.

Our 100% Canadian Data Centres and systems boast SOC 2 Type II accreditation for premier security and regulatory compliance. With IT Weapons, you get comprehensive service and access to our award-winning technical experts.

MICROSOFT AZURE SERVICES

Microsoft Azure Architecture design, security and ongoing operations can be daunting and distract your team from your core business goals. Trust our Microsoft Cloud experts to manage the complexity, control the costs, and keep your business safe amidst the ever-changing security landscape.

OPTIMIZE YOUR CLOUD SPEND

Only pay for what you need. Get Azure billing that's consistent and mystery-free.

DETAILED INSIGHTS TO BOOST PERFORMANCE

We deliver 24/7 performance monitoring, alerting and support. Our team will perform monthly Azure health checks and provide detailed reporting on your cloud usage.

SECURITY & GOVERNANCE

We provide audit logging, security management, role-based access-controls, policy management and more.

EXPERT SUPPORT & GUIDANCE

Our 24/7 Service Desk will help you manage your Azure environment with confidence. With access to Microsoft's Premiere Support and an expert team of technicians, we can help to tackle any service or support issue.

CLOUD CONNECTIVITY

Boost your SaaS apps and Microsoft 365 performance with our SD-WAN cloud and connectivity solutions. An SD-WAN enabled cloud architecture will help your apps and services perform at their best.

IDENTITY & ACCESS MANAGEMENT

With more and more apps, data, and services moving from on-premises to hybrid and cloud environments your business needs a partner you can trust to help manage the complexity and security. From Azure Active Directory, to Single-Sign-On and MFA, let us ease the growing burden of identity and access management for your users.
