Wi-Fi

STAY FAST. STAY SAFE. STAY CONNECTED.

With network reliability impacting employee happiness and productivity, it is important to do everything you can to keep your team connected at all times.

IT Weapons can help.

CORE NETWORKING SERVICES

IT Weapons can help design and improve a safe, scalable company network. We offer a range of solutions, including:

OFFICE CONNECTIVITY

As a CRTC regulated Telecommunications wholesaler, IT Weapons can secure you a fast, reliable connection for your core and remote locations, helping to eliminate complaints of slow internet connections.

WIDE AREA NETWORK (WAN)

A well designed WAN ensures that all of your sites and employees have the ability to access their data and applications, and it is essential for any business with multiple locations.

ROUTING AND SWITCHING

Routing and Switching are core components of your company's networking solution. Poor networking practices and configurations with your routing and switching environment can lead to major security, performance, and uptime concerns.

REMOTE CONNECTIVITY & VPN

Staying connected to the office with on the road or at home is no longer just a nice to have. With secure and reliable VPN and VDI solutions, IT Weapons delivers your apps and data no matter where work takes you.

NETWORK SECURITY

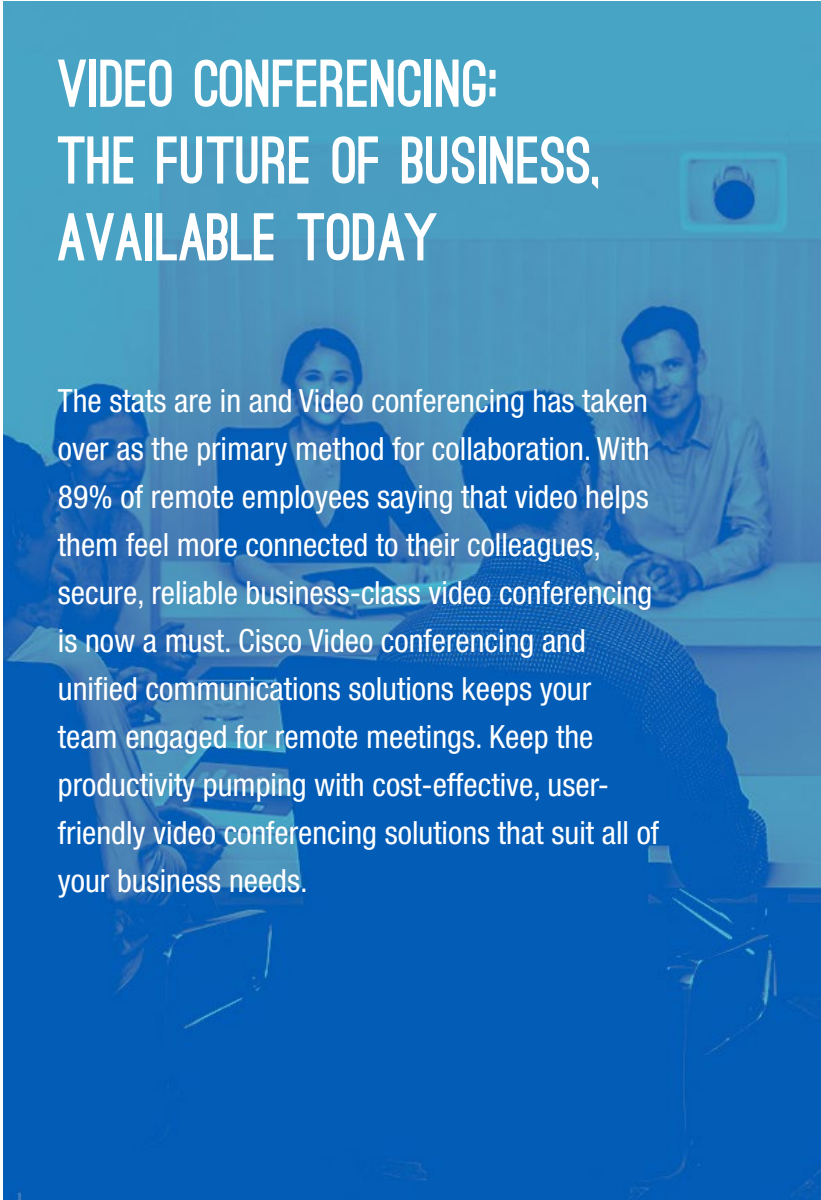

Reliability and speed are important factors to any successful network, however, security should always take priority. Trust that your connections are designed to keep cyber criminals out and your data safe with purpose-built solutions designed to your organization's needs.

WIRELESS CONNECTIVITY CONNECTION ON THE GO

The modern office presents many challenges when it comes to designing a smooth and uninterrupted Wi-Fi experience. Filling cabinets, long hallways, and even drywall present physical obstacles for your wireless connection, creating dead zones throughout your office.

IT Weapons can map your entire office and show you a visual representation of your current wireless coverage. We'll help you identify ideal wireless access point (WAP) placement and show you how to get the most from your Wi-Fi investment.

VIDEO CONFERENCING: THE FUTURE OF BUSINESS, AVAILABLE TODAY

The stats are in and Video conferencing has taken over as the primary method for collaboration. With 89% of remote employees saying that video helps them feel more connected to their colleagues, secure, reliable business-class video conferencing is now a must. Cisco Video conferencing and unified communications solutions keeps your team engaged for remote meetings. Keep the productivity pumping with cost-effective, user-friendly video conferencing solutions that suit all of your business needs.
